Product Description:

Remarkable voice quality. The new standard for everyday conferencing. The Starbase Titan II is the next generation conference phone, redefining the standard for business-quality voice conferencing. With industry-leading full duplex for natural, simultaneous two-way conversation, the Titan II will exceed your expectations in medium to small conference rooms. Delivering remarkable voice quality, using Bi-directional noise suppression which purifies voice signals from both parties making every call a more productive call.

Titan II provides users with features, including a large LCD display that offers easily visible call information and telephone functions. International SonicClear advanced voice-processing technology, for two-way feedback and noise elimination. Add traditional telephone features like redial, mute, transfer, and hold and you have a conference phone that's both familiar and easy to use.

Improve the quality and increase the productivity of your next conference call with the Starbase Titan II.

Please note that this conference phone will only work on an analogue extension
